

Academic Letter of Recommendation

To Whom It May Concern,

Date: 18/08/2021

I am writing to you in support of Mr. Devesh and his desire to attend your reputed university for a post-graduate program within the field of Computer Science. I have known Devesh for six months, instructing Internet Security & Cyber Laws (Semester 4). All through his period, I have connected with Devesh on an academic and individual level. The graduate program will be perfect, to begin with, a step towards accomplishing his dreams, and I am sure that he will exceed expectations in it.

During his tenure as a student, he excelled in all academic assignments and practicals because of his impressive grasp of technical concepts. His submissions were before the deadlines and demonstrated creative thinking. He managed to write clean and efficient code and, his practical evaluations show excellent organization skills. His projects were quite impressive and comprised of two broad sections, Statistical Tools and Web Apps. He implemented his classrooms & self-learnings of Authentication concepts and improved his Website Security features using Node packages such as Passport and GoogleOAuth20. His end-semester assignment on Social Engineering Attack & Section 66B of the IT Act included comprehensive research with brief different industry-related case studies. He managed to surpass all boundaries when it comes to exploration and presentation.

Devesh was managing internships at various startups along with university lectures during the semester. These internships helped him enhance his technical skills like problem-solving and helped him perform more productively as a team using various platforms. He mastered his contribution skills on Git and GitHub, helping him understand how bug tracking using version control works and how deployment works on platforms like Heroku. These internship experiences helped him understand how code-review, scrum meetings work, improving his communication skills.

In the IT domain, an individual needs to be a good researcher & learner as languages & tools keep on improving with time. Devesh proved himself as an ideal learner & great performer through his academics, projects & internships.

I can confidently assert that he will be a resource to the scholar associations at your graduate program, as your university is bent on supporting students to make a difference and seek modern ways in development. I am beyond doubt that the university will advantage his ever-growing pool of information and concepts as Devesh brings new thoughts to every unit. Hence, I provide my highest recommendations for Devesh as a candidate for the Master's program.
